

Issues:

Main dashboard

<http://localhost:3000/dashboard>

Giveaways not loading on server change.

Cause: 404 is not being handled for “NewServer” – ID 1250486002112532584
404 should be handled as it will happen when a server is not yet fully registered.

(Giveaways are Loading in from backend)

Allocations:

<http://localhost:3000/allocations>

- Allocations should have a server dropdown box to select the scope of the allocations returned.

- Main Allocations Page should display Allocations for the selected server (NOT ALL)

Does backend Support this?:

Yes, allocation are returned on a per server basis.

Layout

- Top banner should not move (Scroll)

- Side Nav Bar Should not move (Scroll)

- When Scrolling on Allocations Page the Dark Background of the main page does not match the height of the table.

- Allocations do not need a delete/copy Button.

User/Admin/SuperAdmin/ApprovedUser Views working?

No.

- User (Should see servers they are in) and ability to enter or remove their entry from a Giveaway.
- Admin (Should be able to see Servers they are admin of) create/edit giveaways as well as create Allocations/Vesting reports and approve users for viewing of vesting reports.
- Super Admin – Can view all servers Add/edit giveaways for all.
Add Edit Servers Details.
Add Edit Allocations and Create Vesting reports as well as set approved users for those vesting reports.
- ApprovedUsers, if they are a member of a server they should be able to view it like a member.

If not they should be able to view the vesting button only and pull servers and Reports they are approved for.

Does the backend Support this?:

Yes, after a login is made a call to /user/user-permissions.

isMember: Boolean - True if the user is a member of the server.

isAdmin: Boolean - True if the user is an admin of the server.

isSuperAdmin: Boolean - True if the user is a super admin of the server.

canViewVesting: Boolean - True if the user can view vesting reports.

Can I Add an Allocation?

No.

Modal for creation has allocation number (this is assigned on backend)

Modal is Missing title.

Modal is also missing the following fields:

- mint Date (Date Selector)
- HoldDays(Int)
- Secondary Buy Hold (Int)
- Buy Amount (Int)
- Price Void (3 Decimal place)

No way to select what server the allocation is for (User should select this on the allocation page before creating)

If the allocation is being sent to the backend it will edit the allocation.

Does the backend support this?:

Yes, A Call should be made to:

/get-allocations-ready-for-vesting which will return allocations that can have a vesting report generated (that do not currently have a report generated.

Can I edit an Allocation?

No.

Button Does not work. Modal Should be the same as Above (When the additional Fields have been put in).

does the backend Support this?

Yes, */set-allocation*

Can A Super Admin Change Server Details on Admin Page?

No.

Channel drop downs for the selected server do not work.

does the backend Support this?:

Yes, *PUT /administration-trusted-servers*

Can I Add a New Server (That the Bot can view but is not in the trusted servers?)

No.

The Select Menu for Servers has ALL Server in it.

During this test it should only display NewServer.

Modal Does not work for Channel drop downs or Date Picker.

DOES THE BACKEND Support?:

Yes, *GET /active-servers*, returns servers that are not yet setup.

Can I load up a Specific Vesting Report for a Server AND Allocation name?

No.

When Server is selected, the Second Dropdown selector does not show Allocation/Vesting Report titles available.

Does Backend Support?:

Yes,

/get-vesting-report – loads the Report

Can I create a new Vesting report?

No.

There Should a be a Add Button on the vesting page (ONCE SERVER HAS BEEN SELECTED)

This should then show a list of allocations that can have a vesting report populated for them.

Does Backend Support?:;

Yes,

/set-allocation – if any details for the report are missing for the allocation.

/get-allocations-ready-for-vesting – Returns allocations that have the required params for a report to be generated.

/generate-vesting-report – This will create the new report.

Can I refresh the report for a single user?

No,

- A Button should be provided to refresh each user (Row of the vesting report)
- A Button at the top of the page should be provided to refresh the entire Report.
- Button Should be provided at the top of an already generated report to add more users to the report from the server the allocation is for.

Does the Backend Support this?

Yes,

/generate-vesting-report:

- Send with single user ID that's already in the report to refresh them (then reload the report)
- Send with all users IDs currently in the report to regenerate the same (Up to Date)
- Send a new User ID that is not in the vesting report **BUT IS IN THE RESPECTIVE SERVER** to add a new user to the report.

Can I Create a Giveaway?

No.

No Body returned to endpoint.

Does Backend Support?

yes, endpoints setup and working.

Can I Edit a Giveaway?

No.

Cannot View giveaways to edit them.

Does backend Support?

Yes, backend routes provided.

Are Giveaways being Returned?

Yes. However for Server (NewServer) a 404 is returned as the server is not in trusted servers (Has Not been setup yet). The front end Should Handle this 404.

can I log out?

Yes

what Happens when I enter/dashboard when not logged in?

error.

this should infact redirect to /
